SETUP

Plugs into standard outlet

Who It Is For

-  Owners of Echo Dot (3rd/4th Gen) with Clock
-  Users needing 15W power for Echo Show 5
-  Parents with Echo Dot Kids Edition
-  Fire TV Cube owners requiring stable power
-  Echo Spot users needing reliable adapter
-  Those needing 5-foot cord for desk setup

Who It Is Not For

-  Users with Echo Dot (1st/2nd Gen)
-  Those needing higher wattage (e.g., 30W)
-  People without compatible Echo models
-  Need surge protection beyond UL listing
-  Require shorter 3-foot cord
-  Looking for wireless charging options

Trade Offs to Consider

-  Limited to 15W power for some devices
-  No built-in surge protection
-  Only compatible with specific Echo models
-  Requires separate cable for some devices
-  Not ideal for high-power devices
-  No USB ports for additional peripherals

How It Compares

- No 30W power for high-demand devices
- Shorter 3-foot cord available
- No USB ports for extra peripherals
- Limited to specific Echo models
- No built-in surge protection
- UL Listed but not certified for extreme conditions

Choose This If...

- ✓ Need 15W power for Echo Dot (3rd/4th Gen)
- ✓ Require 5-foot cord for desk setup
- ✓ Use UL Listed adapter for safety
- ✓ Compatible with Echo Show 5 and Fire TV Cube
- ✓ Owners of Echo Dot with Clock
- ✓ Parents with Echo Dot Kids Edition

Skip This If...

- ✗ Need 30W power for high-demand devices
- ✗ Require surge protection beyond UL listing
- ✗ Want shorter 3-foot cord
- ✗ Need USB ports for extra peripherals
- ✗ Use other Echo models not listed
- ✗ Looking for wireless charging options
