## Who It Is For

---

-  Students taking notes in textbooks
-  Researchers annotating PDFs
-  Writers journaling ideas
-  Professionals sketching diagrams
-  Educators creating lesson notes
-  Readers needing margin space

## Who It Is Not For

---

-  Users needing a full tablet experience
-  Those who prefer physical notebooks
-  People without a Premium Pen
-  Users who don't want AI tools

## Trade Offs to Consider

---

- Battery life prioritizes reading over writing
- Limited app support compared to tablets
- No physical keyboard for typing
- Note conversion accuracy may vary

## How It Compares

---

- Better than tablets for note-taking
- Superior to notebooks for digital storage
- Less flexible than dedicated note apps
- More limited than full tablets

## Choose This If...

---

- ✓ Need a device that reads and writes like paper
- ✓ Value AI tools for note refinement
- ✓ Want portable note-taking with e-reader
- ✓ Prioritize long battery life for reading

## ✗ Skip This If...

---

- ✗ Require a tablet-like experience
- ✗ Prefer physical notebooks
- ✗ Don't want AI-powered tools
- ✗ Need extensive app ecosystem
