 **STORAGE TYPE**
Requires USB flash drive for local video storage

 **MONTHLY FEES**
No subscription needed for local storage

 **LIVE VIEW**
Does not support real-time video recording

 **USB REQUIREMENT**
Mandatory for motion clip storage and playback

 **DEVICE LIMITS**
Max 10 cameras for local storage functionality

Who It Is For

-  Users wanting offline video storage
-  Homeowners with Blink cameras needing USB-based recording
-  Those avoiding monthly cloud storage fees
-  Owners of compatible Blink devices
-  People needing to review motion clips anytime
-  Users with external storage solutions

Who It Is Not For

-  Blink XT2/XT camera owners
-  Users requiring live video feeds
-  Those without USB storage devices
-  Customers needing cloud-based storage
-  People with more than 10 Blink devices

Trade Offs to Consider

-  No live video recording capability
-  Dependent on external USB storage
-  Limited to 10 devices for storage
-  No cloud integration options
-  Requires manual USB insertion
-  Incompatible with older camera models

Users Say

● POSITIVES

- ✓ Simple setup with existing USB drives
- ✓ Reliable local storage without subscriptions
- ✓ Easy to access recorded footage anytime

● COMPLAINTS

- ⚠ USB dependency can be inconvenient
- ⚠ No live view feature is a major drawback
- ⚠ Limited to 10 devices for storage

How It Compares

- Better than cloud storage for cost savings
- Less flexible than cloud-based solutions
- More limited than newer Sync Module 3
- Requires manual USB management
- No live view compared to premium models
- Ideal for basic local storage needs

Choose This If...

- ✓ You need offline video storage
- ✓ You want to avoid monthly fees
- ✓ You have compatible Blink devices
- ✓ You have external USB storage
- ✓ You prefer local file management

✗ Skip This If...

- ✗ You need live video feeds
- ✗ You require cloud storage integration
- ✗ You have more than 10 Blink devices
- ✗ You lack USB storage solutions
- ✗ You need automatic cloud backups
