SUPPORT
Cloud updates for new device compatibility

✓ Who It Is For

- ✓ Users wanting to control multiple IR devices
- ✓ Home automation setup for smart TVs and ACs
- ✓ Owners of devices not compatible with RF
- ✓ Those using Alexa or Google Assistant
- ✓ People who need app-based remote control
- ✓ Users who want to automate temperature settings

⊗ Who It Is Not For

- ⊗ Users with 5G Wi-Fi networks
- ⊗ Owners of RF-controlled devices
- ⊗ Those without 2.4GHz Wi-Fi access
- ⊗ People who need Bluetooth support
- ⊗ Users with mesh networks
- ⊗ Individuals who prefer no cloud updates

⚖ Trade Offs to Consider

- No support for 5G or mesh networks
- No Bluetooth compatibility
- Requires 2.4GHz Wi-Fi only
- No built-in battery power
- Limited to 255 devices
- No direct RF control support

💬 Users Say

● **POSITIVES**

✓ Easy to set up with the app

✓ Controls multiple devices from one hub

✓ Works well with Alexa and Google Assistant

✓ Cloud updates keep it compatible with new devices

✓ Good for home automation setups

● **COMPLAINTS**

⚠ No support for 5G or mesh networks

⚠ Limited to 255 devices

⚠ No built-in battery power

⚠ Requires 2.4GHz Wi-Fi only

⚠ No direct RF control support

⇄ How It Compares

● Better than single IR remotes for multiple devices

● Less flexible than RF controllers

● More compatible than older IR hubs

● Easier to set up than RF systems

● Fewer features than RM4 Pro

● More cloud-dependent than standalone hubs

✅ Choose This If...

- ✓ You want to control multiple IR devices
- ✓ You use Alexa or Google Assistant
- ✓ You need app-based remote control
- ✓ You want cloud updates for compatibility
- ✓ You need temperature-based automation
- ✓ You have a 2.4GHz Wi-Fi network

✕ Skip This If...

- ✕ You have 5G or mesh networks
- ✕ You need RF control support
- ✕ You prefer no cloud updates
- ✕ You want Bluetooth compatibility
- ✕ You need more than 255 devices
- ✕ You don't use voice assistants
