Requires 2.4GHz Wi-Fi only

**SETUP METHOD**  
App-based setup with manual learning

**VOICE SUPPORT**  
Works with Alexa, Google Assistant, and IFTTT

**SIGNAL RANGE**  
Limited by line-of-sight for IR signals

## Who It Is For

---

- ✓ Users with multiple IR/RF appliances
- ✓ Voice assistant adopters
- ✓ Remote control enthusiasts
- ✓ DIY home automation builders

## Who It Is Not For

---

- ✗ 5GHz Wi-Fi network owners
- ✗ Rolling code device users
- ✗ Mesh network users
- ✗ Complex automation needs

## Trade Offs to Consider

---

- Limited IR signal range
- Setup complexity for advanced users
- No 5GHz compatibility
- Manual learning required for some devices

## Users Say

---

### ● POSITIVES

- ✓ Easy to integrate with existing smart systems
- ✓ Works well for basic home automation tasks

---

### ● COMPLAINTS

- ⚠ Wi-Fi limitations restrict network flexibility
- ⚠ Manual learning is time-consuming for some devices

## How It Compares

---

- Compare with hubs supporting 5GHz Wi-Fi
- Compare with rolling code RF devices
- Compare with all-in-one smart home controllers
- Compare with voice-only automation systems

## Choose This If...

---

- ✓ You need voice control for IR/RF devices
- ✓ You prefer app-based automation setup
- ✓ You have a 2.4GHz Wi-Fi network
- ✓ You want basic home automation integration

## Skip This If...

---

- ✗ You rely on 5GHz or mesh networks
- ✗ Your devices use rolling codes
- ✗ You need advanced automation features
- ✗ You require long-range signal transmission
