## Who It Is For

---

- ✓ Homeowners wanting smart lighting control
- ✓ Users seeking energy-efficient lighting
- ✓ Those needing Alexa voice integration
- ✓ People looking for customizable color options
- ✓ Individuals wanting mood lighting adjustments
- ✓ Users interested in real-time energy tracking

## Who It Is Not For

---

- ✗ Users without Alexa compatibility
- ✗ Those requiring higher brightness than 800LM
- ✗ Individuals needing more than 16M color options
- ✗ People without access to the Tapo app
- ✗ Users preferring physical switches over app control

## Trade Offs to Consider

---

- Requires app for full control
- No physical switch for immediate use
- Limited to 16M color options
- Depends on Alexa for setup

## Users Say

---

### ● POSITIVES

- ✓ Energy monitoring tracks usage effectively
- ✓ Easy setup with Alexa FFS
- ✓ Customizable lighting for different settings

### ● COMPLAINTS

- ⚠ App can be slow to respond
- ⚠ Limited color options for some users

## How It Compares

---

- Offers Alexa integration and energy tracking
- More color options than basic bulbs
- Includes real-time energy monitoring
- Requires app for full control

## Choose This If...

---

- ✓ Needs smart lighting with Alexa control
- ✓ Wants energy-saving features
- ✓ Requires customizable color options
- ✓ Looking for real-time energy tracking

## Skip This If...

---

- × Prefers physical switches over app control
- × Needs higher brightness than 800LM
- × Requires more than 16M color options
- × Doesn't use Alexa for smart home setup
