Energy monitoring via app

SETUP
FFS setup for easy install

Who It Is For

- Homeowners wanting smart lighting
- Users integrating smart home devices
- Those needing customizable lighting
- Energy-conscious buyers
- Need easy setup without complex steps

Who It Is Not For

- Users without Alexa integration
- Require higher brightness than 800LM
- Need fixed-color bulbs only
- Not interested in energy tracking
- Require multiple bulb support

Trade Offs to Consider

- Higher cost than basic bulbs
- Limited color options compared to competitors
- Setup requires initial app configuration
- Brightness may not match high-end bulbs
- Dependent on app for control
- No physical switch for manual use

⇄ How It Compares

- More color options than standard bulbs

- Brighter than basic smart bulbs

- More energy-efficient than traditional bulbs

- Easier setup than non-FFS devices

- Comprehensive app controls vs basic apps

- Longer lifespan than non-LED bulbs

✓ Choose This If...

✓ Want smart lighting with Alexa

✓ Need energy tracking features

✓ Require app-based automation

✓ Seek customizable lighting

✓ Prioritize easy setup

✕ Skip This If...

✕ Don't use Alexa integration

✕ Need higher brightness than 800LM

✕ Prefer fixed-color bulbs only

✕ Don't care about energy tracking

✕ Require multiple bulb support

✕ Need physical switches for control
