## Who It Is For

---

-  Homeowners needing large display for lighting control
-  Families wanting centralized smart home hub
-  Users desiring voice-activated color adjustments
-  Those looking for split-screen entertainment and lighting controls

## Who It Is Not For

---

-  Users without existing smart home ecosystem
-  Those preferring smaller displays for lighting
-  Individuals avoiding voice-activated controls
-  People seeking no-internet lighting solutions

## Trade Offs to Consider

---

-  Smaller displays offer simpler lighting control
-  Less expensive standalone smart bulbs available
-  Limited color customization compared to high-end bulbs
-  Requires internet for full functionality

## How It Compares

---

- Smaller displays offer simpler lighting control
- Less expensive standalone smart bulbs available
- Limited color customization compared to high-end bulbs
- Requires internet for full functionality

## Choose This If...

---

- ✓ Need large display for lighting previews
- ✓ Want centralized smart home control
- ✓ Prefer voice-activated lighting adjustments
- ✓ Require split-screen entertainment and lighting

## Skip This If...

---

- ✗ Seek simpler lighting control without large display
- ✗ Looking for lower-cost standalone bulbs
- ✗ Avoid voice-activated systems
- ✗ Don't need internet-dependent features
