## Who It Is For

---

-  Home theater owners with 4K projectors
-  Gamers needing immersive 16:9 viewing
-  Users requiring short/UST projector compatibility
-  Those wanting a bezel-free modern look
-  People prioritizing durable screen material
-  Individuals needing precise wall mounting

## Who It Is Not For

---

-  Users needing portable or retractable screens
-  Those with limited wall space for mounting
-  People without 4K Ultra HD projectors
-  Users preferring curved or irregular screens
-  Individuals wanting different aspect ratios
-  Those requiring outdoor screen use

## Trade Offs to Consider

---

-  Heavier than some portable models
-  Requires permanent wall mount installation
-  Higher price than basic screens
-  Limited color options compared to premium models
-  Not suitable for outdoor use
-  Less flexible than retractable screens

## How It Compares

---

- Better brightness and color accuracy than standard screens
- More durable than fabric alternatives
- Supports advanced formats like HDR and 4K
- Requires wall mount installation
- More expensive than basic models
- Edge-free design for a modern look

## Choose This If...

---

- ✓ Need a large 100" 16:9 home theater screen
- ✓ Require 4K Ultra HD and HDR compatibility
- ✓ Want a modern bezel-free design
- ✓ Prioritize durable CineWhite material
- ✓ Need precise wall mounting setup
- ✓ Value long-term warranty and support

## Skip This If...

---

- ✗ Need portable or retractable screen options
- ✗ Have limited wall space for mounting
- ✗ Don't use 4K Ultra HD projectors
- ✗ Prefer curved or irregular screen shapes
- ✗ Want different aspect ratio options
- ✗ Need outdoor screen functionality
