

# GUSUWU G91 Wireless HDMI Transmitter and Receiver Kit

## QUICK BUYER GUIDE

Ideal for users needing wireless multi-TV streaming with plug-and-play setup and 4-display support

### At a Glance Specs

#### WIRELESS HDMI TECHNOLOGY

**Transmits 4K video to up to four displays**

#### POWER REQUIREMENTS

**5V/1A power supply for stable connection**

#### SIGNAL STRENGTH

**Open antenna design for enhanced reception**

#### TRANSMISSION RANGE

**165 feet in open space with 5GHz tech**

#### COMPATIBILITY

**Works with HDMI-enabled TVs, projectors, and laptops**

#### SETUP COMPLEXITY

**Factory-paired plug-and-play with simple pairing**

## Who It Is For

---

- ✓ Home theater setups with multiple displays
- ✓ Classroom presentations across multiple screens
- ✓ Event planners needing multi-TV streaming
- ✓ Remote workers using laptops as secondary screens

## Who It Is Not For

---

- ✗ Users requiring wireless transmission through thick walls
- ✗ Those without HDMI-compatible display devices
- ✗ People preferring app-based control interfaces

## Trade Offs to Consider

---

- Limited range in obstructed environments
- No app for advanced settings
- Requires HDMI ports on all devices
- Signal degradation with multiple walls
- No 3D content support
- Limited to 1080p@60Hz for some devices

## How It Compares

---

- Better than wired extenders (no cable clutter)
- Fewer displays than 4K HDMI switchers
- Shorter range than 2.4GHz alternatives
- No app controls vs smart HDMI switches
- Higher latency than 5G streaming devices

## Choose This If...

---

- ✓ Need 4K wireless multi-display support
- ✓ Want plug-and-play setup without apps
- ✓ Plan to stream from laptops to TVs
- ✓ Require stable 1080p@60Hz performance

## Skip This If...

---

- ✗ Need wireless through thick walls
- ✗ Prefer app-based configuration
- ✗ Require 3D content support
- ✗ Want longer-range transmission
