## Who It Is For

---

-  Homeowners seeking smart lighting control
-  Users wanting voice-activated switches
-  Those needing remote scheduling features
-  Smart home integrators with Alexa/Google
-  DIY installers with neutral wiring
-  Safety-conscious buyers needing UL certification

## Who It Is Not For

---

-  Users without neutral wiring
-  Those requiring hub-based systems
-  People preferring non-voice control
-  Installers without electrical expertise
-  Users needing 5GHz Wi-Fi compatibility
-  Those avoiding UL certification

## Trade Offs to Consider

---

-  Installation requires electrical knowledge
-  Setup needs 2.4GHz Wi-Fi network
-  Limited compatibility with 5GHz devices
-  No built-in hub required
-  Voice commands need internet connection
-  Physical switch remains for emergencies

## How It Compares

---

- Vs. non-smart switches: Wi-Fi control required
- Vs. hub-based systems: No hub needed
- Vs. 5GHz devices: 2.4GHz only compatibility
- Vs. voice-only switches: Physical button included
- Vs. complex setups: App-guided installation
- Vs. basic timers: Voice command integration

### Choose This If...

---

- ✓ Need Wi-Fi-enabled lighting control
- ✓ Want voice command integration
- ✓ Require UL safety certification
- ✓ Have neutral wiring available

### Skip This If...

---

- ✗ Lack neutral wiring access
- ✗ Need hub-based smart home setup
- ✗ Prefer non-voice control options
- ✗ Require 5GHz Wi-Fi compatibility
