Who It Is For

- ✓ Users wanting free local channels
- ✓ Smart TV owners seeking no subscription
- ✓ Those with limited budget for TV services
- ✓ People needing reliable signal in rural areas

Who It Is Not For

- ✗ Users with satellite TV subscriptions
- ✗ Those needing international channels
- ✗ People in areas with poor signal coverage
- ✗ Individuals without access to a window or wall

Trade Offs to Consider

- Limited to local channels only
- Requires setup and signal scanning
- Not compatible with satellite systems
- Signal strength depends on location
- No mobile reception capability
- Not suitable for microwave interference

Users Say

● POSITIVES

- ✓ Easy to install and set up
 - ✓ Strong signal reception in most areas
 - ✓ Good for free local channels
 - ✓ Magnetic base keeps it stable
-

● COMPLAINTS

- ⚠ Signal may vary with location
- ⚠ Not ideal for international channels
- ⚠ Requires TV setup box for older TVs
- ⚠ Cable length may not be enough for some setups

How It Compares

- Better than paid subscriptions for local channels
- Less expensive than satellite systems
- Not as versatile as satellite or cable
- Requires no monthly fees
- More limited than streaming services
- Easier to install than satellite dishes

Choose This If...

- ✓ You want free local channels
- ✓ You prefer no monthly subscription
- ✓ You need a simple setup
- ✓ You have a smart TV or older TV with set-top box

✗ Skip This If...

- ✗ You need international channels
- ✗ You have a satellite TV subscription
- ✗ You live in an area with poor reception
- ✗ You require mobile or portable reception
