Who It Is For

-  Users with existing VESA 100x100 or 75x75 mounts
-  Those needing to mount larger TVs without new hardware
-  Owners of TVs with VESA 200x200 mounting pattern
-  People requiring multiple screw sizes for installation
-  Users prioritizing universal VESA compatibility
-  Individuals with limited wall mount weight capacity

Who It Is Not For

-  Users needing weight capacity extension beyond mount limits
-  Those without existing compatible VESA mounts
-  People requiring adapter plates for non-TV devices
-  Users with TVs larger than 42"
-  Individuals needing pre-installed screws
-  Those prioritizing lightweight materials

Trade Offs to Consider

-  Adapter doesn't increase mount weight capacity
-  Requires existing mount with proper VESA pattern
-  Limited to 23"-42" TV sizes
-  May need additional hardware for larger screens
-  Plastic construction may lack durability
-  No built-in weight distribution features

How It Compares

- Better than single-pattern adapters for multiple TVs
- Less versatile than universal wall mounts
- More cost-effective than buying new mounts
- Fewer features than adjustable mounts
- Simpler than multi-functional mounting systems
- More limited than universal VESA adapters

Choose This If...

- ✓ Need universal VESA compatibility
- ✓ Want to reuse existing mounts
- ✓ Prioritize simple installation
- ✓ Require multiple screw sizes
- ✓ Looking for lifetime warranty
- ✓ Mounting TVs 23"-42"

Skip This If...

- ✗ Need weight capacity extension
- ✗ Require non-VESA mounting options
- ✗ Planning to mount TVs larger than 42"
- ✗ Want built-in weight distribution
- ✗ Need pre-installed hardware
- ✗ Prioritize heavy-duty materials
