## Who It Is For

---

- ✓ Homeowners with 23" to 60" TVs
- ✓ Those needing a low-profile mount
- ✓ Users wanting tilt adjustment
- ✓ People with 16" wood studs
- ✓ Users prioritizing safety
- ✓ Those avoiding permanent installation

## Who It Is Not For

---

- ✗ Users with TVs over 115lbs
- ✗ Those without 16" wood studs
- ✗ People with drywall-only walls
- ✗ Users needing 360° rotation
- ✗ Individuals without a bubble level
- ✗ Those preferring minimalist design

## Trade Offs to Consider

---

- Limited to 7° tilt adjustment
- Requires careful VESA pattern check
- Not suitable for curved TVs
- Installation needs level surface
- Limited wall mounting options
- No cable management features

## Users Say

---

### ● POSITIVES

- ✓ Easy to install with clear instructions
  - ✓ Provides excellent viewing angle
  - ✓ Feels very secure and stable
  - ✓ Looks clean and modern
  - ✓ Works well with most TV sizes
- 

### ● COMPLAINTS

- ⚠ Limited tilt range for some users
- ⚠ No built-in cable management
- ⚠ Requires precise stud location
- ⚠ Not ideal for large TVs
- ⚠ Installation takes time to level

## How It Compares

---

- Better than standard mounts for tilt
- Less than full-motion mounts for rotation
- More secure than basic wall mounts
- Fewer features than ceiling mounts
- Easier to install than heavy-duty mounts
- Less versatile than universal mounts

## Choose This If...

---

- ✓ You need a secure tilt mount
- ✓ Your TV is 23" to 60"
- ✓ You have a 16" wood stud
- ✓ You want a low-profile design
- ✓ You prioritize safety and stability
- ✓ You need a simple installation

## ✗ Skip This If...

---

- ✗ Your TV weighs over 115lbs
- ✗ You have no 16" wood stud
- ✗ You need full rotation
- ✗ You prefer minimalist design
- ✗ You want advanced cable management
- ✗ You have drywall-only walls
