## Who It Is For

---

- ✓ Needs a compact soundbar with multiple connectivity options
- ✓ Wants a TV speaker system with extended bass
- ✓ Seeks easy setup and intuitive controls
- ✓ Requires HDMI ARC for TV audio

## Who It Is Not For

---

- ✗ Needs a high-powered soundbar with more than 90 watts
- ✗ Requires wireless Bluetooth connectivity
- ✗ Wants a soundbar with subwoofer integration
- ✗ Needs a soundbar with app-based controls

## Trade Offs to Consider

---

- Limited power output compared to larger systems
- No Bluetooth connectivity option
- Requires physical cable connections for all inputs
- Doesn't include a subwoofer for deeper bass

## How It Compares

---

- Better than basic soundbars with limited inputs
- Less powerful than floor-standing systems
- More compact than full-sized soundbars
- Fewer connectivity options than premium models

### Choose This If...
