## Who It Is For

---

- ✓ Existing Ring Alarm users expanding system
- ✓ Homeowners with smart home device ecosystem
- ✓ Need secure Wi-Fi coverage for multiple devices
- ✓ Want centralized control for security and network

## Who It Is Not For

---

- ✗ Users without Ring Alarm system
- ✗ Don't need integrated Wi-Fi router
- ✗ Prefer standalone router solutions
- ✗ Averse to subscription-based services

## Trade Offs to Consider

---

- No standalone router included
- Requires subscription for advanced features
- Limited coverage for very large homes
- Complex setup for non-tech users

## Users Say

---

### ● POSITIVES

- ✓ Seamless integration with existing Ring devices
- ✓ Strong Wi-Fi signal throughout home
- ✓ Easy to manage via mobile apps

---

### ● COMPLAINTS

- ⚠ Subscription costs add up over time
- ⚠ Limited third-party device support
- ⚠ No Ethernet port for wired connections

## How It Compares

---

- Integrated Wi-Fi 6 vs. separate router setup
- Smart device compatibility vs. traditional security systems
- Subscription-based features vs. standalone hardware
- Single unit coverage vs. mesh network solutions

## Choose This If...

---

- ✓ Need centralized security and network solution
- ✓ Want Wi-Fi 6 for smart home devices
- ✓ Have existing Ring Alarm system to expand
- ✓ Prioritize easy setup and app-based controls

## ✗ Skip This If...

---

- ✗ Already have dedicated router and network
- ✗ Prefer no subscription-based services
- ✗ Need coverage beyond 1,500 sq. ft.
- ✗ Averse to complex setup processes
