## Who It Is For

---

-  Homeowners needing outdoor security cameras
-  Users wanting instant door activity alerts
-  Smart home integrators with Alexa devices
-  Those prioritizing wireless installation
-  People requiring 24/7 video monitoring
-  Users seeking solar-powered outdoor devices

## Who It Is Not For

---

-  Residents without internet connectivity
-  Those unwilling to pay for Ring Protect
-  Users needing wired doorbell systems
-  People prioritizing free basic alerts
-  Individuals without compatible Alexa devices

## Trade Offs to Consider

---

-  Subscription costs for advanced alerts
-  Solar charging depends on sunlight exposure
-  Limited video recording without subscription
-  Battery life requires periodic recharging
-  Installation needs temporary wall mounting
-  No local storage for video clips

## Users Say

---

### ● POSITIVES

- ✓ Easy to install without professional help
  - ✓ Clear video quality even in low light
  - ✓ Useful for monitoring package deliveries
  - ✓ Works well with existing Alexa setup
- 

### ● COMPLAINTS

- ⚠ Requires ongoing subscription fees
- ⚠ Solar charging is inconsistent in cloudy weather
- ⚠ Battery life diminishes over time
- ⚠ No local storage for video recordings

## How It Compares

---

- Solar-powered vs. wired doorbell systems
- Live view vs. basic motion detection cameras
- Subscription-based alerts vs. free notifications
- Wireless installation vs. permanent mounting
- Smart home integration vs. standalone use
- Battery-powered vs. always-on power sources

## Choose This If...

---

- ✓ Need solar-powered outdoor security
- ✓ Want live video with two-way communication
- ✓ Prioritize wireless installation flexibility
- ✓ Use Alexa-enabled devices for control
- ✓ Accept subscription costs for advanced alerts

## ✗ Skip This If...

---

- ✗ Cannot commit to Ring Protect subscription
- ✗ Require local video storage solutions
- ✗ Need wired installation permanence
- ✗ Avoid battery-powered devices
- ✗ Prefer free basic alert features
