

Smays Wired Ethernet Adapter for Fire TV Stick and Chromecast Ultra

QUICK BUYER GUIDE

Ideal for users needing stable wired internet for Fire TV Stick, Chromecast Ultra, and Tivo Stream 4K

At a Glance Specs

 **COMPATIBILITY**
Works with Fire TV Stick, Chromecast Ultra, and Tivo Stream 4K

 **SPEED**
Supports 10/100M internet with no buffering or lag

 **PORTS**
3 USB 2.0 ports for external drives and peripherals

 **POWER**
5V DC-in powers Fire TV Stick and USB ports

 **SETUP**
Three-step connection for Ethernet and power

 **COLOR**
White finish for discreet placement

Who It Is For

-  Users with Fire TV Stick 4K needing stable internet
-  Chromecast Ultra owners requiring wired connectivity
-  Tivo Stream 4K users avoiding Wi-Fi interference
-  Streamers needing USB ports for external storage
-  HDMI-free setups requiring Ethernet access
-  Users prioritizing low-latency streaming

Who It Is Not For

-  Apple TV users requiring HDMI input
-  Wireless-only setups preferring Wi-Fi adapters
-  Devices incompatible with Micro USB OTG
-  Users needing 10Gbps speeds
-  Systems without 5V/2A power adapters
-  Non-English language device owners

Trade Offs to Consider

-  No Wi-Fi connectivity support
-  Limited to 10/100M speeds
-  Requires compatible power adapter
-  USB ports share power with device
-  No app-based control options
-  Not suitable for 4K streaming alone

Users Say

● POSITIVES

- ✓ Easy setup with clear instructions
- ✓ Stable connection for 4K streaming
- ✓ Additional USB ports for peripherals

● COMPLAINTS

- ⚠ Limited port count for multiple devices
- ⚠ Dependent on external power source
- ⚠ No warranty or return policy details

How It Compares

- Unlike wireless adapters, offers stable wired connection
- Fewer ports than full USB hubs
- No Wi-Fi capabilities compared to all-in-one adapters
- Requires separate power adapter
- Slower than Gigabit Ethernet solutions
- More complex setup than single-cable adapters

Choose This If...

- ✓ Need reliable wired internet for streaming devices
- ✓ Require USB ports for external storage
- ✓ Prefer low-latency connection for gaming
- ✓ Use compatible power adapter
- ✓ Want simple, no-frills setup

✗ Skip This If...

- ✗ Need Wi-Fi connectivity for mobile devices
- ✗ Require 10Gbps speeds for high-end networks
- ✗ Have HDMI-dependent streaming devices
- ✗ Need multiple USB ports for peripherals
- ✗ Prefer wireless-only solutions
