## Who It Is For

---

- ✓ Home theater users with multiple devices
- ✓ Smart home integrators using Alexa/Google Assistant
- ✓ Users needing customizable button layouts
- ✓ Those requiring long-range signal coverage

## Who It Is Not For

---

- ✗ Users with fewer than 20 devices
- ✗ Those without smart home systems
- ✗ People needing physical button-only controls
- ✗ Users prioritizing minimal setup

## Trade Offs to Consider

---

- Learning curve for app customization
- Requires hub for extended range
- Battery life may vary with frequent use
- Setup complexity for multi-device pairing

## How It Compares

---

- Supports 60+ devices vs. 20-30 typical
- Voice control integration vs. basic remotes
- Customizable buttons vs. fixed layouts
- Hub-based range vs. line-of-sight signals

### Choose This If...

---

- ✓ Need multi-device control
- ✓ Use voice-activated assistants
- ✓ Want customizable button layouts
- ✓ Require extended signal range

### Skip This If...

---

- ✗ Have fewer than 20 devices
- ✗ Don't use smart home systems
- ✗ Prefer simple button-only controls
- ✗ Want minimal setup effort
