Who It Is For

-  Homeowners with Wi-Fi routers
-  Users who want free local TV
-  People who record multiple shows
-  Those who watch TV on multiple devices
-  Individuals who avoid subscription fees
-  Users with smart TVs or streaming devices

Who It Is Not For

-  Non-smart TV users
-  Those without a stable internet connection
-  Users who need a remote control
-  People who want satellite TV
-  Individuals who watch only streaming content
-  Users with limited storage needs

Trade Offs to Consider

-  No built-in remote control
-  Limited antenna range in rural areas
-  Requires compatible smart devices
-  No app for non-smart TVs
-  Setup may take time for beginners
-  No support for older TV models

Users Say

● POSITIVES

- ✓ Easy to set up with the app
- ✓ Works well with multiple devices
- ✓ No monthly fees or contracts
- ✓ Records multiple shows at once
- ✓ Good range for indoor use

● COMPLAINTS

- ⚠ No remote control included
- ⚠ Antenna range may be limited
- ⚠ Not compatible with all TV models
- ⚠ Setup can be confusing for some
- ⚠ No support for older TVs

How It Compares

- Better than streaming services for free local TV
- More flexible than single-tuner devices
- Less expensive than satellite systems
- Easier to use than complex recording setups
- More reliable than some streaming apps
- Fewer features than premium DVRs

Choose This If...

- ✓ You want free local TV
- ✓ You need to record multiple shows
- ✓ You have compatible smart devices
- ✓ You avoid subscription fees
- ✓ You watch TV on multiple devices
- ✓ You want no monthly costs

Skip This If...

- × You don't have a smart TV or streaming device
- × You need a remote control
- × You have a poor internet connection
- × You only watch streaming content
- × You don't want to record TV
- × You need satellite TV
