

TP-Link Kasa LB130 Smart LED Bulb - Dimmable Multicolor Wi-Fi Light with Alexa/Google Assistant Support

QUICK BUYER GUIDE

Smart home users wanting voice-controlled color-changing LED lighting with app-based scheduling

At a Glance Specs

POWER CONSUMPTION

60 watts with 11 watt LED source

BRIGHTNESS

800 lumens for bright ambient lighting

COLOR OPTIONS

Dynamic multicolor with mood-setting hues

COMPATIBILITY

Works with Alexa, Google Assistant, and Kasa app

INSTALLATION

Standard bulb fit with Wi-Fi setup via app

WARRANTY

2-year manufacturer warranty included

Who It Is For

- ✓ Smart home users wanting voice-controlled lighting
- ✓ People needing color customization for ambiance
- ✓ Users requiring app-based scheduling and automation
- ✓ Those seeking Wi-Fi-enabled bulb without hub

Who It Is Not For

- ✗ Homeowners without 2.4 GHz Wi-Fi network
- ✗ Users needing dimming without app control
- ✗ Outdoor lighting applications
- ✗ Those preferring traditional non-smart bulbs

Trade Offs to Consider

- Higher power usage vs. traditional bulbs
- Limited color temperature range (9000K only)
- Requires stable internet connection
- No built-in motion sensor

How It Compares

- Better than traditional bulbs with app control
- Similar to other smart bulbs in color options
- More expensive than non-smart equivalents
- Fewer features than premium smart bulb systems

Choose This If...

- ✓ Want smart lighting with voice control
- ✓ Need color customization for ambiance
- ✓ Seek app-based scheduling and automation
- ✓ Have 2.4 GHz Wi-Fi network available

Skip This If...

- ✗ Require outdoor lighting solutions
- ✗ Prefer traditional non-smart bulbs
- ✗ Lack stable internet connectivity
- ✗ Need motion sensor functionality
